Project Update - #9

CTH-DD Bridge over Honey Creek

September 1, 2017

The CTH-DD Bridge over Honey Creek is now Open To Traffic. Despite a two week delay due to flooding in July, the contractor was able to recover the schedule and complete the project on time. Thanks to careful project management, each of the final construction operations were completed in succession with no down-time or lost days.

Approach Reconstruction (Photo Looking East)

Asphalt Paving Complete – Landscape Restoration Underway

Guard Rail Installed

Detour Signs Removed – Highway Re-opened to Traffic

This will be the final update for this project. We greatly appreciate everyone's patience and cooperation during construction. With proper inspection and maintenance, this structure should serve the public until at least 2092. Have a safe and enjoyable Labor Day weekend.
