Project Update - #1

CTH-G Bridge over Honey Creek

July 9, 2018

Work is expected to begin this week on the CTH-G (Church St.) Bridge over Honey Creek in the Village of East Troy. This project involves replacing the existing bridge and upgrading the roadway approaches which will include new sidewalk along west side. The road will be closed to through traffic beginning July 11th, and will remain closed until the project is completed in late October.

The posted detour route will use I-43, STH-20 and CTH-ES. Motorists may also find other suitable alternate routes. Emergency services are aware of the closure.

A copy of the detour map is posted on the Walworth County website. Look for the "Highway Updates" link on the Walworth County Home Page, or use the link provided at the bottom of this page.

CTH-G (Church St.) Bridge - Built in the Late 1940's

Please note that this project does not involve any work on the adjacent dam, which is owned and operated by the Village of East Troy.

We would also like to take this opportunity to remind everyone that construction sites and large equipment can be both attractive and dangerous to curious children. Please warn children of the dangers and keep them clear of the construction area and equipment.

We understand this is an inconvenience and appreciate your patience and cooperation during this time. Walworth County is committed to maintaining its highway and bridge infrastructure in a state of good repair and is funding this project entirely. Using County dollars allowed us to avoid much of the red tape associated with the State and Federal funding programs, greatly reducing the design timeline and cost. Despite added utility coordination, environmental permitting and site constraints, this project was designed, permitted, publicly bid, and awarded in less than 11 months.

The project team is dedicated to completing the work as soon as possible. We will be sending out periodic updates as the work progresses.
