

# Walworth County COVID -19 Phased Guidance

Revised 1/2021

This document provides guidance for community recovery from COVID-19. Walworth County strongly supports the safe reopening of our local economy and encourages organizations and individuals to apply this guidance. Organizations should feel empowered to implement solutions that best meet their needs and should develop plans to adjust practices in the event of another rise in COVID-19 cases. These recommendations are subject to change and will be superseded by any state, federal, or other governing body orders or requirements.

These recommendations follow a phased structure to encourage our community to move towards a new normal safely and incrementally. Walworth County Public Health tracks a number of Key Indicators to determine when it is safe to advance to next phase or return to a previous phase. Walworth County's Key Indicator status is updated weekly and can be found at our website. COVID-19 is an evolving public health situation that will be regularly monitored and evaluated.

The recommendations in this document are broken down by sector and organization type. Every setting is unique and will call for different strategies to protect customers, clients, and staff. We anticipate that our business and community leaders will follow these guidelines and implement strategies to best protect our community.

COVID-19 has made it clear how intertwined our health is with that of our fellow community members. When our actions are motivated by the safety and wellbeing of our neighbors, our entire community's health benefits. Together, and in partnership across public and private sectors, we can overcome this unprecedented public health situation.

	<b>Safer at Home</b> 3/25/2020- 5/13/2020	<b>Phase 1</b> <i>Entered 5/14/2020</i> <i>Reentered 11/24/20</i>	<b>Phase 2</b> <i>Entered 7/2/2020</i> <i>Entered 1/25/2021</i>	<b>Phase 3</b> <i>Entered 2/18/2021</i>	<b>Phase 4</b>
<b>Key Indicators to Meet</b>		Any primary key indicator is below benchmark and trending downward. Remain in phase if no improvement. Continue to reassess every 14 days.  <i>Move to Phase 2 if:</i> Improvement in all primary key indicators for at least 14 days.	Any primary key indicator is below benchmark. Remain in phase if no downward trend in primary key indicators or no improvement. Continue to reassess every 14 days.  <i>Move to Phase 3 if:</i> Improvement in all key indicators for at least 14 days.  <i>Move to Phase 1 if:</i> Any primary key indicator is below benchmark and downward trend in primary key indicators for at least 14 days.	Any primary key indicator is below benchmark. Remain in phase if no downward trend in primary key indicators or no improvement. Continue to reassess every 14 days.  <i>Move to Phase 4 if:</i> All primary key indicators are at or above benchmark for at least 14 days and secondary key indicators trend upwards for at least 14 days.  <i>Move to Phase 2 if:</i> Any primary key indicator is below benchmark and downward trend in primary key indicators for at least 14 days.	All primary key indicators are at or above benchmark and no downward trend in secondary key indicators.  <i>Move to Phase 3 if:</i> Any primary key indicator is below benchmark and downward trend in any primary key indicators for at least 14 days.

## Public Health Recommendations for Phases 1-3 for All Business and Organization Categories

### Universal Practices

- Practice physical distancing of 6 feet or more when in public.
- Wear an appropriate face covering when indoors or in an enclosed space, other than at a private residence. Wear outdoors when physical distancing is not possible. Children under the age of 2, individuals who have trouble breathing, individuals who are incapacitated, and individuals with medical, intellectual or developmental disabilities, or mental health conditions do not need to wear a face covering.
  - An appropriate face covering refers to a piece of cloth or other material that is worn to cover the nose and mouth completely. Examples include bandanas, cloth facemasks, disposable or paper masks, neck gaiters, or religious face coverings. Choose a mask with two or more layers of washable, breathable fabric that fits snugly against the sides of your face. Proper face coverings do not include mesh masks, masks with holes or openings, or masks with vents.
  - When wearing a face covering or mask, it is important to:
    - Keep the mask on your face the whole time you are out.
    - Don't put the mask around your neck or on your forehead.
    - Wash your hands before putting on your mask and after taking it off.
    - Cover your nose and mouth and try to fit it snugly against the sides of your face.
    - Wash your mask after each time you wear it (for re-usable masks)
    - Remember that face coverings are NOT a replacement for social distancing; meaning you should still remain 6 feet apart from others even if you are both wearing a mask.
  - Face shields are not recommended as a substitute for other appropriate face coverings. Face shields are primarily used for eye protection for the person wearing it and it is not yet known what level of protection a face shield provides from respiratory droplets.
  - Exceptions to face covering use:
    - Children between the ages of 2 to 5 when physical distancing is possible
    - While eating or drinking
    - When communicating with an individual who is deaf or hard of hearing and communication cannot be achieved through other means
    - While obtaining a service that requires the temporary removal of the face covering (i.e. dental services)
    - While swimming or on duty as a lifeguard
    - While a single individual is giving a presentation for an audience, the single speaker may remove the face covering when actively speaking. While the face covering is removed, the speaker should remain at least 6 feet from all other individuals
    - When engaging in work where a face covering would create a risk to the individual
    - When necessary to confirm the individual's identity (i.e. when entering a financial institution)
    - When working in a private office/cubicle if workspace consistently offers 6 feet physical distance from nearest coworker. This may not be feasible in areas of high traffic
- Wash your hands often with soap and water for at least 20 seconds or use hand sanitizer with at least [60% alcohol](#). Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid indoor spaces as much as possible, particularly ones that are not well ventilated.

Customer and Patron Safety	<ul style="list-style-type: none"> <li>• Develop clear face covering policies for staff and patrons that are consistent with the above guidance on face coverings.</li> <li>• Encourage physical distancing.</li> <li>• Offer disposable face coverings for customers and guests.</li> <li>• Adopt protocols to routinely clean and disinfect, especially commonly touched surfaces. Plan for enhanced cleaning in the event of a positive COVID-19 case in the <a href="#">business</a>. This includes cleaning and disinfecting payment stations after each patron if electronic or online payment is not possible.</li> <li>• Discontinue use of water fountains/bubblers. Utilize contactless bottle fill stations or single use cups.</li> <li>• Consider creating designated work/business hours only for vulnerable populations and those at <a href="#">higher risk</a>.</li> <li>• Clearly communicate safety steps through social media, newsletters, and signage.</li> <li>• Post signage at business to encourage: <ul style="list-style-type: none"> <li>○ The use of face coverings by patrons that aligns with face covering guidance</li> <li>○ The practice of physical distancing of 6 feet or more.</li> <li>○ Washing of hands and use of hand sanitizer</li> <li>○ That individuals should NOT go to the business if they feel sick or have come in contact with someone who feels or has felt sick.</li> </ul> </li> <li>• Post all signage in multiple languages (for example, English, Spanish, Hmong, Somalian, Lao).</li> <li>• Consider postponing large group gatherings or events unless physical distancing of 6 feet or more and proper sanitation can be in place for spectators/guests.</li> <li>• Provide proper cleaning and sanitizing measures for both employees and customers. See: <a href="#">How to build a hand-washing station for \$20</a>. Provide hand sanitizer if a washing station is not possible</li> <li>• Where possible, offer curbside pick-up, curbside drop-off, delivery of goods and services.</li> <li>• When possible, offer online or phone payments (i.e.; touchless payments like ApplePay, CashApp, PayPal, etc.), and online appointments and reservations.</li> <li>• Use of partitions and barriers to improve physical space between workers and other workers, customers, and clients. Ensure that the partitions or barriers are of sufficient dimension and appropriate material, e.g., Plexiglas or taut heavy plastic curtains stretched and secured, as necessary.</li> </ul>
Employee Safety	<ul style="list-style-type: none"> <li>• Consistent with face covering guidance, require employees to wear face coverings. Provide them to employees if possible.</li> <li>• If possible and feasible, provide protective equipment and supplies, such as face masks, face shields, gloves, hand sanitizer, disinfectants. Provide training when required and on proper use for all applicable materials.</li> <li>• Limit the number of workers present on premises to no greater than recommended phase capacity. Promote telework options or special accommodations for nonessential or vulnerable employees, as well as meetings and other work operations that can be done virtually. Additional alternatives include use of communication boards or digital messaging/email to convey pre-shift meeting information rather than holding staff meetings.</li> <li>• Clearly and quickly, inform your employees and wider community of any policy changes.</li> <li>• Pre-screen employees for symptoms prior to starting shift using the <a href="#">Walworth County Employer/Employee Screening Tool</a>.</li> <li>• Do NOT allow symptomatic people to work. Send them home if they arrive at work sick.</li> <li>• Provide the opportunity for staff to wash hands often (if hand sanitizer is not available).</li> <li>• Encourage all staff to cover coughs and sneezes using elbows (not hands).</li> </ul>

	<ul style="list-style-type: none"> <li>Promote physical distancing in the workplace and utilize disinfection guidelines per the CDC.</li> <li>Consider expanding sick leave and FMLA.</li> <li>When possible, stagger shifts and breaks to reduce the numbers of workers per shift, including offering flexible schedules and create employee cohort teams to minimize exposure between staff.</li> <li>Utilize communications tools found in the <a href="#">Wisconsin Department of Health Services Employer Toolkit</a>.</li> <li>When possible, schedule stocking and other maintenance operations during off-peak hours.</li> <li>As applicable, use virtual meetings/messaging to minimize physical interaction</li> </ul>
